Applications will be available June 15, 2005, for a controlled deer herd reduction at 16 state parks and one nature preserve. Reductions will take place on November 14 -15 and November 28 -29. Hunters will be selected using a random drawing. Deer taken in these hunts are in addition to all other bag limits (see page 16).

**Mail-in applications and instructions will be available at all state park and reservoir property offices, or it can be downloaded at [www.dnr.IN.gov](http://www.dnr.IN.gov).**

If you would like an application mailed to you, fill in your name and complete mailing address on the post

card below. Check the State Park Deer Reduction box.

Deer herd reductions are required periodically at state parks to maintain a deer herd that is compatible with the ecosystem of each state park.

By the 1990s, numerous plant species and entire ecosystems of most Indiana state parks were damaged significantly due to an overpopulation of white-tailed deer. Wildflowers, shrubs and tree species, that had been absent for years in some state parks, now are returning as a result of the deer herd reduction effort – and that provides food and shelter for other wildlife. Your assistance in dealing with this problem is greatly appreciated.
